Product Description

Basic Info.

Model NO.	Hypericin Extract
Application Form	Powder
Application	Food
State	Powder
Extract Source	Dendrobium Officinale Extract
Place of Origin	Shanghai, China
Type	Herbal Extract
Form	Powder
Variety	Codonopsis Extract
Part	Seed
Extraction Type	Liquid-Solid Extraction
Grade	Food Grade
Usage	Health Food
Cultivation Method	Artificial Planting
Appearance	Brown Powder
Certificate	Organic Kosher Halal Sc
Color	Brown Color
Shelf Life	2 Years
Storage	Cool Dry Place
Brand Name	KOMESZ
Transport Package	1kg/Bag 25kg/Drum
Specification	Powder
Trademark	KOMESZ
Origin	Shanghai
Production Capacity	2000 Metric Ton/Metric Tons Per Year

Product Description

Products Description

Hypericin is a natural compound derived from the herb *Hypericum perforatum*, commonly known as St. John's Wort. It is a red pigment that belongs to the class of compounds known as polyphenols. Hypericin has been the focus of scientific research due to its potential medicinal properties.

Function

Hypericin is known for its antiviral and antibacterial effects. Studies have shown that it exhibits potent antiviral activity against certain viruses, including herpes simplex virus and human immunodeficiency virus (HIV). Additionally, it has demonstrated antibacterial properties, which may help fight against various bacterial infections.

Furthermore, Hypericin has been studied for its antidepressant properties. It is believed to work by increasing the levels of certain neurotransmitters, such as serotonin, dopamine, and norepinephrine, in the brain. This mechanism has shown promise in alleviating symptoms of mild to moderate depression.

Application

In terms of applications, Hypericin is commonly used in the form of dietary supplements or herbal remedies. It is also being explored in the pharmaceutical industry for the development of novel drugs and therapies. However, it is important to note that the use of Hypericin may have certain side effects and can interact with certain

medications, so it is recommended to consult a healthcare professional before using it.
