Product Description

Product Description

Centella asiatica grows in tropical swampy areas. The stems are slender, creeping and creeping, green to reddish-green, connecting plants to each other. It has a long stalk, green, rounded apex, smooth texture, and palmate reticular veins. The leaves are borne on a ring-shaped petiole and are about 2 cm (0.79 in). The rootstock consists of rhizomes that grow vertically downwards. They are creamy in color and covered with root hairs. Asiaticin is a triterpene glycoside derived from the plant Centella Asiatica. This activity is the result of stimulating collagen and glycosaminoglycan synthesis.

Function:

1. Centella asiatica extract asiaticoside with the use of anti-infective agent;
2. Centella asiatica extract powder have sedative and tranquillizing effect ;
3. Centella asiatica extract asiaticoside used to induce diuresis and reducing edema;
4. Centella asiatica extract asiaticoside powder with the function of clearing away heat and toxic materials;
5. Centella asiatica extract powder used to promote collagen form and make the skin smooth and elastic.

Application:

1. Applied in the Food field, it has become a new raw material which used in food and beverage industry;
2. Applied in the Health product field;
3. Applied in the Pharmaceutical field.
4. Applied in the Comestics field.
